PRODUCT SERIES OVERVIEW

- The Crossfire with its 1250gpm rated flow in fixed or portable operations, integrates the unique Safe-Tak valve to prevent unintentional movement during operations.

- The Crossfire includes a lightweight portable base with stainless spring steel folding legs with carbide tips to provide improved stability during operations on all surfaces. Also included as standard equipment is a quickly deployable safety tie down strap, rotational lock, and an easy to see attachment lock mechanism.

- The Crossfire is available with your choice of combination nozzles or stacked tips, incorporates an automatic drain feature, and easy to read pressure gauge, and offers an easily upgradeable inlet component.
