Low-Profile Design & Best-In-Class Flow Rates

Categories: Ball Intake Valves, Buy Online

The Jumbo Low-Profile Ball Intake Valves are designed for tight apparatus compartments and high-flow applications. With manual and remote control options, they come in swiveling elbow configurations for easy hose connections. The valves offer compatibility with Storz and NH thread types and feature optional pressure relief valves for added safety. Their low-profile design ensures they are ideal for compact setups, while maintaining high water flow and durability.

Key Features:

- **Low-Profile Design:** Fits compact setups while still supporting high water flow.
- **Swiveling Elbow Configuration:** Enhances hose connection flexibility in tight spaces.
- **Manual and Remote Control Options:** Available with top crank, front crank, or remote controls for versatile operation.
- **Storz and NH Thread Compatibility:** Ensures wide compatibility with firefighting apparatus connections.

Task Force Tips
