CATALOG ITEM PRICING

TFT has created a separate price list for items found in this catalog. To download the most current price list or to find a PDF version of this document, go to tft.com/Catalog-Price-List. In addition, products on TFT's website include the current list price.

THREAD ORDERING INFORMATION

All products will be delivered with National Hose threads (NH) unless otherwise specified at the time of order.

National Hose threads (NH) per NFPA 1963. British Standard Pipe threads (BSP) with 55 degree Whitworth form are produced to ISO 228. Straight Iron Pipe threads (NPSH, IPT or SIPT) are produced to ANSI/ ASME B1.20.7-1991. Tapered Iron Pipe threads (NPT, TPT or TIPT) are produced to ANSI/ASME B1.20.1-1983 (R1992). Consult the factory for further information.

Thread Code Notation: There is no additional charge for special threads. We maintain a library of hundreds of special thread specifications. Specifications from individual cities with functionally identical threads are grouped together in thread codes. TFT's code or specifications for threads will be needed at time of order. Please include TPI (threads per inch) and ODM (outside diameter). Also provide name of city to assure special threads match your specification. Some codes may extend normal order delivery times.

Task Force Tips products are available with many optional inlets. Optional inlet coupling styles are normally kept in stock. Consult factory for your specific requirements. For additional information on thread specifications and ordering, see thread information in the Technical Data section in the back of the catalog.

RETURN POLICY

Seller will not consider requests for credit returns made more than 180 days after the date of shipment. Shipments received in a damaged condition must be reported to us immediately upon receipt. No credit returns shall be accepted by Seller unless accompanied by a Return Goods Authorization (RGA) issued by Seller. Seller shall have no obligation to issue an RGA. Seller reserves the sole right to determine the eligibility of items for credit.

Items which are received in non-returnable condition for credit will be handled in one of the following ways:

- Destroyed with Purchaser's approval
- Returned to Purchaser at its expense
- Refurbished and returned to Purchaser at its expense with its approval
- Partial credit issued to Purchaser at the sole discretion of Seller

Seller will have no responsibility or liability in connection with items returned for credit without an RGA. Credit returns arriving without a valid RGA may be refused. All items returned must be properly packed and identified in accordance with the RGA.

All costs and expenses associated with credit returns shall be borne by Purchaser. Return costs and expenses may include labor, material, administrative, and any other costs and expenses arising out of the return.

A minimum 20% restocking charge will be assessed on all credit returns. Any credit will be subject to and conditioned the receipt of the returned items in new, unused, undamaged and salable condition. All promos that no longer qualify will be reversed. Individual components purchased as part of a "package" may not be returned.

Seller may accept a credit return and waive the restocking or cancellation fee in the event Seller determines that the return was due to an error that was the fault of Seller. Returns for repair do not require an RGA, but should be registered using the TFT website at tft.com/ support. If use of the website is not possible, information concerning repairs can be obtained by calling the Seller's Customer Care Team at 219-462-6161 or writing to Seller at Task Force Tips, 3701 Innovation Way, Valparaiso, IN 46383, USA. Repair returns may be subject to a repair estimate fee that will be waived if the repair is made.

All credit and repair returns are at Purchaser's or its customer's sole risk and expense, and any shipping charges on returned items shall be paid by Purchaser or its customer. No collect shipments will be accepted unless authorized in writing in advance by Seller.

STATEMENT OF WARRANTY AND REPAIR

For warranty statement, please visit tft.com.

G-FORCE® NOZZLES

High Performance Features

NFPA COMPLIANT

Based on a highly customizable global nozzle platform design, the unique G-Force series of fixed, selectable, and automatic nozzles combine over 40 years of Task Force Tips design innovation and experience into true next generation firefighting tools. Manufactured exclusively at TFT's USA production facilities, the G-Force series is supported by an extensive infrastructure of 24-hour technical service representatives,

on-line documentation, digital video training library, exclusive product serialization and tracking capabilities, and a proven 5 year product warranty. Incorporating unique performance components such as a stainless steel slide valve, inlet debris screen and protective fog pattern choices, the G-Force series delivers high performance and rugged dependability in a low cost package.

G-FORCE® NOZZLES

High Performance Features

NFPA COMPLIANT

FM APPROVED >

Tip Only, Shutoff and Shutoff with Grip Models

With hundreds of available models, the G-Force series offers two piece tip only and ball valve configurations for break-and-extend operations, as well as one piece nozzles with an integrated slide valve. All models, including two piece ball valve configurations, can be ordered with a color coded pistol grip and valve handle cover.

Fixed Cut Metal, Molded Rubber, or Metal Spinning Teeth

All models may be ordered with your choice of diamond cut fixed metal, fixed molded rubber, or metal spinning teeth. All fog teeth are designed to provide superior pattern

performance and outstanding firefighter protection without bent, broken, or missing teeth. The bonded rubber bumper provides long term rugged dependability even in the harshest firefighting conditions.

Rugged Color Coded Valve Handle and Pistol Grip

Ergonomically shaped pistol grip, valve handle and covers made from super tough polymer for rugged dependability. Eleven available colors allow for customization for pump discharge hoseline identification, for specific fire apparatus, specific stations or department.

Stainless Steel Slide Valve

Unique slide style valve with positive valve position detents provides turbulence-free stream performance even when gating the nozzle.

Integral Debris Screen

Inlet screen on all slide valve models and 38 mm models prevents pattern destroying debris from entering the nozzle and becoming lodged. Items that pass through the screen are easily

flushed out the front of the nozzle

Flush without Pattern Adjustment or **Nozzle Shut Off**

Nozzles can be easily and effectively flushed of unwanted and pattern destroying debris that enters the

nozzle without shutting down or changing pattern selection during hazardous firefighting conditions.

Reflective Labeling and Permanent Laser Markings

Reflective clear coated labeling provides a visually reflective image at night or in dark

conditions. High contrast laser engraved operational controls are permanently marked for a lifetime of rugged service.

Model Serialization

Each nozzle is permanently marked with a unique serial number that aids in departmental asset tracking, manufacture date, model identification, and easily

tracks service and warranty activities. Web enabled online serial number search also provides immediate access to all operational and

Index Ring

Large, easy to grip index ring provides both visual and tactile indication of operational flow or flush choices.

Tactile Pattern Position Indicator

Tactile indicator preset to straight stream position offers optional pattern selection detent. The quick change pattern adjustment allows straight stream to a wide protective fog pattern with one simple hand motion.

G-FORCE® NOZZLES Flow and Pressure Choices

NFPA COMPLIANT

Fixed Pressure and Flow

Optimal straight stream and fog pattern performance are achieved at a single rated flow and single rated pressure.

Selectable Flow with Fixed Pressure

Optimal straight stream and fog pattern performance are achieved at the selected flow and the single rated pressure.

Automatic Pressure / Variable Flow

Optimal straight stream and fog pattern performance are achieved over the rated flow range at the rated pressure.

Impulse™ Trigger Valve System

Task Force Tips has never been afraid to challenge the status quo of initial attack firefighting.

The revolutionary IMPULSE trigger valve system can now be integrated into many G-Force firefighting nozzles as an option.

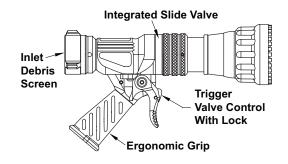

The innovative integration of a trigger actuator with TFT's globally recognized slide style of valve, provides complete nozzle operator flow control with only a single hand, allowing the other hand to consistently control stream pattern selection. The trigger controller operates smoothly and easily throughout

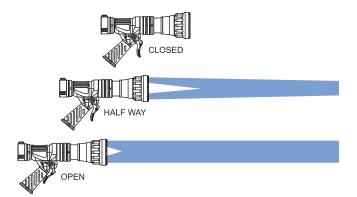

the nozzle's rated flow and pressure range, and offers the ability to hold multiple valve positions at the operator's discretion. The unique ergonomic pistol grip compliments the trigger valve design and greatly reduces operator fatigue.

- Ergonomic Pistol Grip w/available color coding
- Trigger Valve Controller with removable flow lock
- Integrated Slide Style Shut Off Valve
- Front Protective Bumper with Multiple Fog Tooth Designs

G-FORCE® FOAM ATTACHMENTS FOAMJET™

Low and Multi-Expansion foam attachments are designed specifically to enhance foam application performance through the G-Force Series of fixed, selectable gallonage, and automatic nozzles.

Attachments are easily added or removed using a simple clamping mechanism that attaches to the nozzle's front bumper. Produced from lightweight polymers or rubber, both the low expansion and multi-expansion attachments are ideally suited for Class A and flammable liquid applications.

The multi-expansion attachment offers flexibility by allowing the user to independently achieve both increased reach and higher foam expansion ratios with the same tool in different stream settings. The low expansion attachment can be ideal for Class A and most Class B foam agents and allows for greater distance of reach for rapid fire knockdown from a safe distance.

G-Force Foam attachments are compatible with most Class A and Class B Foams

	Low Expansion Long Tube	Multi- Expansion

FOLDING PISTOL GRIPS

This space-saving, folding pistol grip will take up less space and allow the TFT nozzle to fit into tight crosslays and hose beds. It deploys quickly and easily, locking in place automatically. When ready to stow, simply press the lock release button and fold it back. Pistol grip is machined from aluminum alloy and hardcoat anodized for durability and corrosion resistance.

DUAL GALLONAGE TWISTER™ NOZZLE SERIES 19 mm and 25 mm

The TWISTER series nozzles are selectable, dual gallonage, combination nozzles that are designed for simplicity and durability. The rubber bumper provides a positive grip and protects the front end. Twisting the shaper from the off position produces the following settings: low flow straight stream, low flow narrow fog, high flow straight stream, and high flow fog. The rugged, economical nozzle also accepts the FJ-MX-D FoamJet multi-expansion foam aspirating attachment.

DUAL GALLONAGE FOAM BUBBLE CUP° FOAM NOZZLE SERIES 25 mm

The Bubble Cup, 25 mm series, is a unique combination nozzle capable of producing aspirated foam, straight stream and a wide fog pattern. When the outer sleeve is in the retracted position, the nozzle operates as a standard dual gallonage straight

stream/combination nozzle. To use the aspirating feature of the nozzle, the nozzle operator slides the outer sleeve forward, and by adjusting the pattern, has control of reach and aspiration.

HM792-DKIT	QuadraFog D- SERIES	21.6 cm	0.8 kg

SELECTABLE GALLONAGE QUADRAFOG® DQ60 NOZZLE SERIES 25 mm

The Quadrafog DQ60 is a selectable gallonage nozzle series that is similar to the DQ40 version but with an additional higher flow setting. The QuadraFog DQ60 is selectable gallonage nozzle series for use on 1.0" (25 mm) hose lines. Available as tip only, or with bail type shut-off handle.

- All lightweight materials
- Hardcoat anodized aluminum
- Flush without shutting down
- Metal cut fog teeth or spinning teeth
- Accepts FJ-DQ low expansion or the FJ-MX-DQ multi-expansion foam attachments
- Metric models may vary from units shown. See chart below.

With Pistol Grip DQS60P DQS-EKFP-BD

- 25 mm Rocker lug swivel inlet
- Stainless steel shut-off ball
- Quick-change rear valve seat

SELECTABLE GALLONAGE QUADRAFOG® NOZZLE SERIES 38 mm

APPROVED

NFPA COMPLIANT

An excellent selectable gallonage nozzle for any 38mm hose line. The QUADRAFOG is an economical and lightweight combination nozzle suitable for use with low-expansion or multi-expansion foam attachments. 25 mm versions range are 20-150 l/min or 20-230 l/min. The 38 mm version has a range of 110-470 l/min, and is available in high(7 bar) or low-pressure (5 bar) versions with either a molded rubber bumper or stainless steel spinning fog teeth.

- All lightweight materials
- Hardcoat anodized aluminum
- · Flush without shutting down
- Metal cut or stainless steel spinning fog teeth

FLIP TIP® NOZZLES

Flip Tip® Tip-Only

The Tip-Only Model is an ideal choice for an addition to any ball valve shut off. Integrating your choice of two smoothbore combinations, the Flip Tip quickly and positively allows the initial attack team a choice of flows as well as outstanding stream performance.

- Lightweight and Compact Design
- Tips Easily Removed for Line Extension
- · Multiple Smoothbore Choices Both Front and Rear

Flip Tip® with Integrated Ball Shutoff

Integrated with a high volume ball shutoff, the combination Flip Tip provides a single nozzle that offers a choice of hard hitting straight streams. The detent style ball shutoff allows positive operator control and the rugged durability of polymer handles and pistol grip.

- Optional Color Coded Pistol Grip and Valve Handle Covers at No Additional Charge
- High Volume Detent Valve for Maximum Performance
- Compact Integrated Design

FLIP TIP® Performance Features

Front Tip Orifice Choice

Flip Tip's front component accepts one of 7 different orifice choices. Providing flows from 200 up to 1100 l/min, the tip can be easily removed allowing hose to be connected and extended. All tips have knurled swiveling couplings and a unique tapered waterway for maximum stream quality.

Rear Tip Orifice Choice

The rear component of the Flip Tip is available in 6 different orifice sizes and provides water flows starting at 570 l/min. All uniquely tapered tip inserts are designed to offer high performance water or compressed air foam streams, and are held securely in place during rugged initial attack operations.

Flip Tip® with Integrated Ball Shutoff and G-Force Nozzle

Integrated with a high volume ball shutoff and your choice of G-Force combination nozzle, the Flip Tip provides a single nozzle that offers both a hard hitting smoothbore and high performance combination nozzle. The detent style ball shutoff allows positive operator control, choice of 7 bar or low pressure 5 bar, and fixed molded rubber, spinning metal, or fixed cut metal fog teeth.

- · Choice of Fixed, Selectable, or Automatic Tip
- Integrated Combination Nozzle and Smoothbore Base
- · Choice of Operational Pressures and Fog Tooth Designs
- Optional Color Coded Pistol Grip and Valve Handle Covers at No Additional Charge

Stream Straightener

To provide maximum stream performance, all 38 mm Flip Tip Models integrate a lightweight stream straightener directly into the rear coupling system.

stream performance, the insert can be easily removed.

The Flip Tip can be quickly and securely changed from small tip to large tip during firefighting operations using a positive twist lock mechanism that prevents unintentional movement. The locking ring is easily rotated with a wet or foamy gloved hand.

TRANSFORMER™ EV NOZZLE SYSTEM

The EV (Electric Vehicle) kit is designed to make applying water to the underside of an electric vehicle easy for your crew. Each kit includes four .5 m extension tubes and a distributor (cellar) nozzle with a wide, fully filled pattern that allows water to map across the battery compartment for effective cooling.

Reaching an overall length of more than 2.2 meters when fully assembled, the added extension tubes allow your crew to put space between themselves and the fire.

- 3 port junction block
- Distributor nozzle
- Four .5 meter extension tubes
- Twist-grip shutoff valve
- Heavy-duty carrying bag with compartments

PIERCING NOZZLE TRANSFORMER™ PA1

The Transformer PA1 Piercing Nozzle System is designed to deliver water or foam solutions to areas inaccessible to the fire fighter. A series of jets near the point apply a wide reaching pattern at a rated flow of 570 I/min @ 7 bar.

The PA1 system includes a unique twist-grip shutoff valve, a 3 port junction block with striking head, 2 extension tubes, and the flow tube with piercing point. The easy to use and rugged, twist-grip shutoff valve, regulates nozzle flow without the need for an additional shutoff valve.

The 3 port junction block and striking head allow the nozzle to be configured to short, medium, long and L shaped combinations, making it easily adaptable to specific fireground situations.

The PA1 system features a hardened steel piercing point, all extension tubes and valve are constructed of hardcoated extruded aluminum, and a sturdy nylon carrying bag with compartments for each component is included.

PA1 SYSTEM

PA1	Inlet
Includes: 2 - 19" (48 cm) Extension Tubes, 1 - 14" (36 cm) Flow Tube with Piercing Point, Twist-Grip Shutoff Valve, 3 Port Junction Block with Striking Head, and Nylon Carry Bag	38 mm NH Female
PA1-52MM	Inlet
Includes: 2 - 19" (48 cm) Extension Tubes, 1 - 14" (36 cm) Flow Tube with Piercing Point, Twist-Grip Shutoff Valve, 3 Port Junction Block with Striking Head, and Nylon Carry Bag	52 mm (2.0") Storz
PA1-CSF	Inlet
Includes: 2 - 19" (48 cm) Extension Tubes, 1 - 14" (36 cm) Flow Tube with Piercing Point, Twist-Grip Shutoff Valve, 3 Port Junction Block with Striking Head, and Nylon Carry Bag	65 mm (2.5") Chinese Snap Fit Inlet

PIERCING NOZZLE TRANSFORMER™ PA2

The Transformer PA2 Piercing Nozzle System is designed to deliver water or foam solutions to areas inaccessible to the fire fighter. A series of jets near the point apply a wide reaching pattern at a rated flow of 570 l/min @ 7 bar.

The PA2 system includes a distribution nozzle rated at 570 $\rm I/min$, that provides a wide fully filled pattern, and an adapter allowing the distributor nozzle to be used on any 38 mm NH threaded hoseline.

Also included is a unique twist-grip shutoff valve, a 3 port junction block with striking head, pistol grip, 2 extension tubes, and the flow tube with piercing point. The easy to use and

rugged, twist-grip shutoff valve, regulates nozzle flow without the need for an additional shutoff valve.

The 3 port junction block and striking head allow the nozzle to be configured to short, medium, long and L shaped combinations, making it easily adaptable to specific fireground situations.

The PA2 system features a hardened steel piercing point, an aluminum and stainless distribution nozzle, all extension tubes, pistol grip and valve are constructed of hardcoated extruded aluminum, and a sturdy nylon carrying bag with compartments for each component is included.

PA2 SYSTEM

PA2	Inlet
Includes: 2 - 19" (48 cm) Extension Tubes, 1 - 14" (36 cm) Flow Tube with Piercing Point, Twist-Grip Shutoff Valve, Pistol Grip, 3 Port Junction Block with Striking Head, Distribution Nozzle, Adapter, and Nylon Carry Bag	1.5" (38 mm) NH Female

Blitzfire®

With Blitzfire your attack monitor operations will set the standard for excellence amongst departments worldwide. You can choose from various options that include oscillation and high elevation. Your fireground safety is critical so, your monitor will include an integrated shutoff valve that, when activated, minimizes the effect of water hammer. With a 10° low elevation and 86° high elevation range of motion you have the flexibility to reach basements, attics, and everything in-between with confidence.

Blitztac™

This compact portable monitor turns one firefighter with one hose into an aggressive 2000 L/min first responding force. Once set, your monitor can be manually regulated or used in an unattended manner for exposure protection or full flow attack. The patent pending integrated safety inlet protects your crew from unintended monitor movement. It's also fully certified to NFPA 1964 and EN15767-1.

Blitzforce™

When you need an affordable, compact, and trustworthy monitor, the Blitzforce is might be your best choice. With a 2000 L/min capability and lightweight stowable form factor, you'll easily accomplish your flow targets while taking up minimal space in your truck compartments. At this price point your Blitzforce monitor will not include advanced options like a safety shutoff or high elevation capability.

Crossfire®

Your lightweight and incredibly versatile master stream attack monitor option. Crossfire can be connected to either a portable base or directly to your truck.

With a flow rating of 4500 L/min in portable operation, the Crossfire monitor integrates an exclusive Safe-Tak safety shutoff system to prevent unintentional movement and keep your crew safe.

Portable Monitor with Safety Shut-off Valve BLITZFIRE®

TFTs' BLITZFIRE is a simple, light, and highly maneuverable attack monitor. The low elevation angle makes it suitable for use indoors. If the BLITZFIRE starts to slide or lift, the SAFETY Shut-off VALVE automatically shuts off the flow of water. The shut-off action slows near stroke end to reduce the effects of water hammer. To reset the flow, simply open the valve to any of six detent flow positions with the turbulence-free

slide valve. The discharge pivots make directing the stream extremely quick and effortless. Outlet has built-in stream shaper. A unique up/down pivot on the hose inlet allows the monitor to have stability even on porches and stair landings. Folding legs have replaceable carbide tipped spikes. An anchor strap is included for safe operation.

- Flows up to 2000 I/min
- Body is hardcoat anodized aluminum
- · Blue TFT powder coat finish inside and out
- Six detent flow positions with a turbulence free slide valve
- Elevation is manually adjustable between 10° and 46° above horizontal
- Horizontal rotation is manually adjustable 20° either side of center
- · Outlet has built-in stream shaper
- Standard inlet is 65 mm swivel rocker lug coupling. Standard outlet is 65 mm rigid male threads

- Stainless steel and hardcoat aluminum
- Can be mounted for rapid deployment of a preconnected BLITZFIRE.
- Mounts on any accessible vertical or horizontal surface.
- 50.8 x 21.6 x 5.1 cm

Oscillating Portable Monitor with Safety Shut-off Valve BLITZFIRE® Oscillating

TFTs' BLITZFIRE is a simple, light, and highly maneuverable attack monitor. The low elevation angle makes it suitable for use indoors. If the BLITZFIRE starts to slide or lift, the SAFETY Shutoff VALVE automatically shuts off the flow of water. The shut-off action slows near stroke end to reduce the effects of water hammer. To reset the flow, simply open the valve to any of six detent flow positions with the turbulence-free slide valve.

The discharge pivots make directing the stream extremely quick and effortless. A unique up/down pivot on the hose inlet allows the monitor to have stability even on porches and stair landings. Folding legs have replaceable carbide tipped spikes. An anchor strap is included for safe operation. Oscillating feature will sweep nozzle 20°, 30° or 40° side to side. Manual override allows manual horizontal movement and easy re-engagement of automatic oscillation.

20°, 30°, or 40° total sweep

To add the oscillating feature to an existing BLITZFIRE, contact TFT's Service Department.

Portable Monitor with Safety Gating Inlet BLITZTAC™

The BLITZTAC is one of Task Force Tips' innovative, lightweight, and highly versatile portable attack monitors. Rated up to 2000 l/min, BLITZTAC integrates a low loss waterway with positive locking valve control, and a corrosion resistant anodized and powder coat finish, while providing a simple easy to reset safety gating device. If the BLITZTAC starts to slide or lift, the safety gating inlet will automatically reduce the flow of water. To reset, simply close the valve to stop water flow and position the monitor back into the full flow position. The discharge pivots make directing the stream extremely quick and effortless. With

PORTABLE LIGHTWEIGHT ATTACK MONITOR BLITZFORCE™

BlitzForce Lightweight Portable Attack Monitor

The BlitzForce is one of Task Force Tips' innovative, lightweight, and highly versatile portable attack monitors. Rated up to 1,890 l/min, BlitzForce integrates a low loss waterway with positive locking valve control, and a corrosion resistant anodized and powder coat finish. An exclusive high strength tie-down strap and carbide tipped folding legs offer extreme stability in varying fire environments. With an integral stream shaper for superior reach and penetration performance, the BlitzForce delivers a 20° side to side (40° total) and a 20° to 60° up and down range of stream motion. A five year warranty, stainless steel apparatus mounting bracket, and your choice of combination nozzle or stacked tips are standard.

Small, Lightweight and Compact Design

Weighing just 6.6 kg, the BlitzForce stores securely for a rapid deployment in a space of only $48 \times 23 \times 30$ cm and a ground hugging 66 cm wide when deployed for initial attack.

High Flow, Low Loss Waterway

Full flow 52 mm waterway provides 1,890 l/min initial attack flows with only 0.5 bar loss. A removable internal stream straightener is standard, and the valve design provides positive locking in the closed position.

Optional Oscillation

The BlitzForce OSC monitor features a water driven turbine that when engaged, allows the nozzle to automatically sweep 10°, 15°, or 20° either side of center. The simple to use oscillating mechanism can be disengaged allowing manual horizontal rotation.

Maximum Stability in Harsh Conditions

High strength folding aluminum alloy legs include replaceable carbide tip spikes and integrated nylon kneepads for maximum stability during operation. The BlitzForce also incorporates an exclusive, quickly deployed, high strength tie down strap to prevent unintentional monitor movement.

High Performance Fire Streams Flexibility

With horizontal rotation of 20° either side of center, and an elevation range 30° to 60° in unassisted mode, or a low 20° angle when assisted, the BlitzForce provides amazing operational versatility. Each monitor package comes with a choice of a combination nozzle, or triple stacked tips 25, 32, & 38 mm with laser engraved flow charts.

Rugged Durability

Each monitor is produced from hardcoat anodized aluminum alloy, stainless steel, and is powder coated for maximum corrosion and abrasion resistance. Permanent laser engraved operational instructions, reflective labeling, unique product serialization, and a stainless apparatus mounting bracket are all standard.

PORTABLE / DECK GUN MONITOR CROSSFIRE® SERIES

The CROSSFIRE monitor is the most versatile master stream appliance ever offered to the fire service. Its lightweight, compact design and unique quick-release swivel joint allow for a faster and safer stream deployment in the portable attack mode.

MODEL	DESCRIPTION
XFT-NJ	65 mm NHM OUTLET
XFT-BJ	65 mm BSPM OUTLET

The Safe-Tak 1250 utilizes the revolutionary Safe-Tak "flow safety valve." Should the monitor lose contact with the ground surface, the Safe-Tak will automatically reduce flow to the monitor. This safety feature reduces the risk of injury from an out-of-control appliance. Monitor top and base are hardcoat anodized aluminum with a powder coat finish inside and out for superior corrosion protection. Truck mount adapter not included, order separately.

- Flow range up to 4750 I/min
- 65 mm outlet
- Can be connected to either a portable base or a truck with adapters or a TFT Extend-A-Gun with XL outlet.
- Large 83 mm waterway
- · The connection is easy, positive, and visually verified
- 360° horizontal rotation
- Highly visible pressure gauge and a built-in automatic drain

CROSSFIRE STORAGE BRACKET

13 ga., 304 stainless steel bracket with strap holds the Safe-Tak 1250 portable base securely while being transported. This bracket can be mounted vertically or horizontally in any position, including the top or underside of a shelf, on a side wall, or on a compartment door. Includes quick release storage strap.

37.5 x 19.7 x 5.1cm 1.40 kg

PORTABLE / DECK GUN MONITOR SAFE-TAK™ 1250 CROSSFIRE PORTABLE BASE WITH SAFETY VALVE

Portable bases are supplied with either two clappered swivel inlets or with a single full-time swivel inlet and include the SAFE-TAK "flow safety valve". The stainless steel, carbide-tipped base support legs can be folded to easily fit inside a small apparatus compartment, or for carrying pre-connected to a hose line. Includes a safety tie-down strap with attached storage cap.

CROSSFIRE® SERIES ACCESSORIES

EXTEND-A-GUN PIPE

A simple and cost effective way to easily add 16"(40.6 cm) to your CROSSFIRE Deck gun outlet connection. Simply remove the CROSSFIRE monitor from the existing truck mount adapter, add the Extend-A-Gun Pipe and connect the CROSSFIRE top. Increases the field of fire by raising the CROSSFIRE monitor to clear obstructions on the top of the apparatus. Utilizes

the same quick connect features of the CROSSFIRE monitor. Visually verifiable rotation lock and locking mechanism.

- Made from hardcoat anodized aluminum alloy for lightweight and corrosion resistance.
- Not for use on Extend-A-Gun telescoping waterway.
- · Not for use on portable ground base.

HEMISPHERE[™]

Transportable Monitor

The HEMISPHERE is a versatile, lightweight, and quick to deploy portable monitor that gives the user the ability to quickly establish water flow in locations that ground monitors cannot. Since the Hemisphere doesn't rely on gravity for stability, it can be pointed horizontal and down, in addition to up, unlike portable ground monitors. The rotating, swiveling waterway allows the stream to be pointed in virtually any direction within a hemispherical range

■ HPM111A ■ HPM132A*

■ HPMG111A

with Pressure Gauge

10.6 kg 28.4 cm Height

29.5 cm Width 53.6 cm Depth

without interrupting water flow. A variety of mounts, including an I-beam clamp that doubles as a 52 mm hitch mount, a dedicated hitch mount, and fixed mounts provide the user the ability to quickly attach the monitor and establish coverage on the fire ground or in preplanned locations. An integrated quarter-turn aluminum half ball valve with locking handle provides shut-off capability. The monitor and valve bodies are hardcoat anodized aluminum inside and out with a blue TFT powder coat finish.

- Flow range up to 2000 I/min
- Swiveling 45° valved inlet and a rotating swiveling outlet
- Outlet is manually adjustable via a double ball swivel, angled 40° from the main waterway, capable of sweeping 80°, and can be rotated about the main waterway a full 360° by a hand crank
- · Outlet has a built-in stream straightener
- Water pressurized pins prevent the monitor from releasing while flowing

- Optional 0-20 bar pressure gauge available
- Protective ring and lens cover
- Gauge reads inlet pressure when valve is closed

HEMISPHERE[™]

Transportable Monitor Mounting Options

This hardcoat anodized aluminum and stainless steel clamps can be quickly attached to objects such as: an I-beam, stair rails, tank lip, industrial scaffolding, round and various other odd shaped objects by one person without the use of tools. The mount and clamp jaws can be moved to any of the 42 positions on the backbone for maximum versatility. Detented pins hold the mount and jaws in place and a travel stop

keeps the pins attached to prevent them from being dropped or lost. Once the clamp is secured, the Hemisphere monitor is attached to the clamp by sliding the socket at the base of the monitor over the mount. The jaws can be removed and the backbone can be inserted into any standard 52 mm hitch giving the ability to quickly add a monitor to most vehicles without costly modifications.

All Hemisphere Mounting Options Adjust Quickly and Easily

FlexTM Monitors

Integrating feedback from the fire service and using proven water path designs developed for the Blitzfire portable monitor, we've built you a masterstream monitor that checks all the boxes for performance, reliability, serviceability, and flexibility. With fewer bends for the water to navigate, Flex delivers best-in-class friction loss while having the most compact size so you can put out the fire with confidence and ease.

FOR THE MOST UP-TO-DATE PRICING AND PRODUCT INFORMATION VISIT TFT.COM

Articulating Waterway

The patented waterway eliminates excessive curves and bends while giving you total control of your water stream.

Flex is compatible with your favorite masterstream nozzles and also works with the Vortex and your favorite set of stacked tips!

Results at 1500 GPM 25 20 15 10 5 FLEX: MONSOON TYPHOON: STREAMMASTER COBRA

Flex integrates proven water path design originally developed for the Blitzfire portable monitor that delivers amazing stream reach and the lowest friction loss available from any brand at only a .28 bar loss while flowing 5678 LPM.

Stream Master" and Cobra" are trademarks of their respective owners and are not affiliated, endorsed, connected or sponsored in any way to Task Force Tips or any of our products or brands.

Lowest Friction Loss

Easy to Program, Use, and Service

A free app allows easy programming for your custom needs and pairing with other RC devices.

Custom program buttons, stops, and park.

Controllers have customizable buttons for specific operations. Programming can be saved for multiple installations or future unit installation.

The app also allows for simple diagnostics, troubleshooting, and program updates without removing hardware.

SmartPlex[™] Controls & Pairing

Quickly scan and pair your Flex to any Extend-A-Gun, VUM, or multiplex system on your apparatus.

Customizable Controls

Change your labeling for any monitor function, lights, cameras, and other accessories.

Compact Size, Big Flow

Flex easily fits in the dunnage, on an aerial ladder or platform, or on the back of the body.

Stow Height: 423 mm Swing Radius: 150 mm

Flex easily fits where competitive models don't and it's compatible with 75 mm and 100 mm waterways. It's also compatible with Extend-A-Gun extendable waterways.

Swing Radius R6.00in

Configurable & Upgradeable

Flex delivers for today and in the future by bringing a new level of configurability. Using a single monitor design, choose from a 75 mm or 100 mm waterway for flow rates from 4750-7600 l/min.

Manual, RC and Tiller models are available with a wide range of nozzle options.

YE-CAN2	Converts CANbus signals into serial communications for controlling a TFT RC monitor or valve. Use to retrofit a FLEX monitor with Legacy Extend-A-Guns and VUMs.	13.7 x 4.2 x 3.5 cm	85 gr

EF1™ RC 40 to 750 l/min

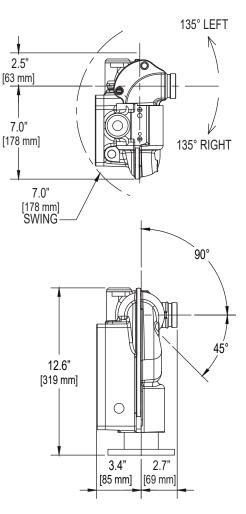

The EF1 RC monitor is extremely compact, yet it has a large 38 mm waterway, capable of flowing up to 750 l/min, making it the ideal forestry bumper turret. Waterway with turning vane has only 1.3 bar friction loss at 750 l/min. Elevation range is 90° above horizontal to 45° below. Horizontal travel is 270° (135° either side of a center position). Field changeable horizontal travel stops to give 180° (90° either side of a center position). Designed for 12 VDC or 24 VDC operation, selection is automatic. The EF1 RC monitor optional controllers (sold separately) allow for monitor horizontal rotation, elevation, nozzle pattern, programmable PARK and Oscillate. The motor control circuits use position encoders and current limiting to protect the drive train at the ends of travel. Unit has waterproof factory installed plug on power wire for easy removal or reinstallation. Electric drives and control box are waterproof. Main waterway made from hardcoat anodized aluminum. Silver powder coat finish. Various inlets are available. Contact factory for details about wireless operation.

Y1-E31A

SAMPLE PART NUMBER **7.7 kg**

- Excellent wildland and interface monitor
- Compact for front bumper mounting
- Enclosed motors and electronics
- External wiring is reduced to a minimum
- Single plug for quick installation
- IP65 ingress protection on electronics

The Tornado RC is very compact, yet it has a large 2-¼" waterway, capable of flowing up to 2000 l/min, making it the ideal bumper turret. Waterway with turning vane has only 1.3 bar friction loss at 2000 l/min. Elevation range is 90° above horizontal to 45° below. Field changeable elevation travel stops at 45° above and 20° below horizontal. Horizontal travel is 370° (185° either side of a center position). Field changeable horizontal travel stops to give 180° (90° either side of a center position). Designed for 12 VDC or 24 VDC operation, selection is automatic. The Tornado RC comes with a control panel on the monitor for horizontal rotation, elevation, nozzle pattern, programmable PARK and Oscillate. The motor control circuits use position encoders and current limiting to protect the drive

train at the ends of travel. Unit has waterproof factory installed plug on power wire for easy removal or reinstallation. Knobs for manual override are provided on the horizontal rotation and elevation drive. Electric drives and control box are waterproof. Main waterway made from hardcoat anodized ANSI 356-T6 aluminum. Silver powder coat finish inside and out. Various inlets are available. Locking quick connect inlets allows for quick removal of the Tornado for installations such as bumper mounting, where the monitor must be removed to tilt the cab of the truck. For wireless operation, purchase wireless operator station and radio/antenna found in the RC Monitor Controls and Accessories section of the catalog.

TORNADO® RC DUST MITIGATION 2000 I/min Compact Industrial Monitor

TFT's TORNADO RC compact industrial monitor is designed for both fire and industrial applications. This industrial version is certified to ingress protection IP66/67 to limit penetration of dust and moisture into the electronics, ball races and gears. Models are remotely operated and are capable of flowing up to 2000 l/min. Heavy duty seals and O-rings help mitigate contamination in applications like mining and road construction.

- High performance seals in both the vertical and horizontal axis minimize penetration of dust and moisture in bearing races
- Override knobs have been replaced with protective caps and seals to minimize penetration of dust and moisture in the worm gear area
- 340° maximum total rotation for the horizontal axis
- · Horizontal axis has infinitely adjustable travel stops

Worldwide Approval and Certifications

from agencies around the world, as well as being a Registered Firm to ISO 9001:2015 by Underwriter's. Certificates for specific models are available for review at tft.com/documents, and include approvals of remote controlled models used in potentially hazardous atmospheres as well as country specific requirements.

All products are designed, developed, and manufactured in the United States of America at our Valparaiso, Indiana world headquarters.

Operating voltage of 12 or 24 VDC, selection is automatic. Hardcoat aluminum, powder coated inside and out. Programmable stow, and vertical and horizontal oscillation. 135° vertical range (-45° to +90°) 12.3 kg.

TORNADO® MANUAL MONITOR 2000 I/min Compact Monitor

The Tornado is very compact, yet it has a large 57mm waterway, capable of flowing up to 2000 l/min, making it the ideal manual turret. Waterway with turning vane has only 1.3 bar friction loss at 2000 l/min. Elevation range is 90° above horizontal to 45° below. Has 360° continuous horizontal rotation. Main waterway made from hard coat anodized ANSI 356-T6 aluminum. Silver powder coat finish inside and out. Various inlets are available.

PROTECTOR™ FIXED STATION MONITOR 4750 I/min

The Task Force Tips' Protector is a simple and rugged fixed station monitor with many unique features. Its patented waterway gives low friction loss and delivers water to the nozzle with fewer twists and turns than a conventional monitor. The optional built-in on/off valve with position indicator eliminates the need to add a costly valve to the monitor installation. The Protector is capable of flowing up to 4750 l/min while maintaining a FULL 360° rotational ability. The lever-action rotational lock is activated in one motion, visually confirmed, and securely holds the monitor's horizontal position. The Protector can be directly bolted to many common pipe flanges.

The outlet is available with various 65 mm male threads. The simple and basic design requires no grease application or other maintenance. Swiveling elements and seals (including valve seat) can be replaced within a few minutes with common hand tools. Threaded ports 6 mm NPT are provided for drain valve (included) and pressure gauge installation. Maximum pressure is 17 bar. The Protector is hardcoat anodized ANSI 356-T6 aluminum and is fully powder coat finished inside and out. Swivel clamps, 75 mm valve ball, trunnions, and hardware are 18-8 stainless steel.

HURRICANE™ MANUAL 4750 I/min Fixed Station Monitor

FM

The Task Force Tips' Hurricane is a durable, industrial, high-capacity fixed monitor. The Hurricane has high flow and low friction loss characteristics. The red powder coat finish (inside and out), and stainless steel elevation drive make the Hurricane one appliance that can stand up to tough service environments. The Hurricane is capable of flowing 4750 I/min while maintaining a FULL 360° rotational ability. The lever-action rotational lock is activated in one motion, visually

confirmed, and securely holds the Hurricane in position. A built-in automatic drain protects the monitor from freezing. The placement of grease zerks allows the Hurricane monitor to be quickly and easily serviced and lubricated, and a threaded port 6 mm is provided for a pressure gauge. The Hurricane is made from hard anodized ANSI A356-T6 aluminum. The Hurricane industrial monitor comes with our exclusive 5-year warranty.

The Hurricane RC is an electric remote controlled monitor, with a single low-profile waterway discharge. The Hurricane RC has high flow and low friction loss characteristics. Capable of flowing 4750 l/min while maintaining a FULL 450° rotational travel (225° either side of center). Maximum operating pressure is 14 bar. Field changeable horizontal rotation stops at 45°, 90° and 135° either side of center position. Elevation range is 90° above horizontal to 45° below. Designed for 12 VDC or 24 VDC volt operation, selection is automatic. The Hurricane RC comes with a control panel mounted on the monitor for horizontal rotation, elevation, nozzle pattern, programmable PARK and Oscillate. The motor control circuits are factory installed on the monitor and use position encoders and current limiting to protect the drive train at the ends of travel. Unit comes with 30 feet of ultra-flexing robotics power cable already wired to the monitor,

and is enclosed in a unique cable guide that allows FULL 450° of horizontal travel, which is far more reliable than slip rings or coil cords. Knobs for manual override are also provided. TFT's Master Stream ERP nozzles plug into the factory installed nozzle power wire. Electric drives and control box are waterproof. Standard outlet is 65 mm NH male thread. A built-in automatic drain protects the monitor from freezing. A threaded port 6 mm NPT is provided for optional pressure gauge. The monitor is made from hardcoat anodized ANSI 356-T6 aluminum and silver powder coat finish inside and out. For wireless operation, purchase wireless operator station and radio/antenna found in the RC Monitor Controls and Accessories section of the catalog. Inlet also made for direct connection to TFT's electric Extend-A-Gun RC3, RC4, and Extend-A-Gun VP.

MONSOON® 1250

Manually Controlled Monitor - 4750 I/min

The Monsoon is a manually operated monitor designed for flows up to 4750 l/min. Maximum operating pressure is 14 bar. Unique patented segmented waterway has only 0.4 bar friction loss at 4750 l/min. Water makes very few turns as it travels through the monitor resulting in low friction loss and a far-reaching effective stream. Elevation range is 90° above horizontal to 45° below. Field changeable elevation travel stops at 45° above, 30° above, and 30° below horizontal. The manual model has continuous horizontal rotation with field changeable stops at

various inlet flanges and threaded fittings. Inlet also made for direct connection to TFT's Extend-A-Gun series and Valve Under Monitor series. See chart below for model numbers. Main waterway made from hardcoat anodized aluminum.

FM

APPROVED

Silver powder coat finish inside and out is standard, except when "- Z" is added to the end of the model number. Models ending in "- Z" have American Red powder coat finish. Standard outlet is 65 mm male thread.

Remote Controlled Monitor - 4750 I/min Designed for Pumper Applications

The Monsoon RC for pumper installations is an electric remote controlled monitor that has all the benefits of the Monsoon monitor with the addition of powered operation. It has a greater horizontal sweep angle than the RC model for Ladder or Platform installations. Designed for 12 VDC or 24 VDC operation, selection is automatic. The Monsoon RC comes with a factory installed control panel mounted on the monitor for controlling horizontal rotation, elevation, nozzle pattern and programmable PARK and Oscillate. The motor control circuits are factory installed on the monitor and use position encoders and current limiting to protect the drive train at the ends of travel. Unit comes with 30' (10 m) of ultra-flexing robotics cable already wired to the monitor so installation effort is minimized. Cable has only four conductors (two for power and two for communications), further easing the installation effort. Cable is

enclosed in a unique wire guide that allows 450° of horizontal travel (225° either side of a center position), which is far more reliable than slip rings or coil cords. Knobs for manual override are provided on the horizontal rotation and elevation drive. TFT's Master ERP nozzles plug into the factory installed nozzle power wire. Electric drives and control box are waterproof and have a IP66/IP67 rating. Main waterway made from hardcoat anodized aluminum. Silver powder coat finish inside and out. Standard outlet is 65 mm rigid male thread. Other outlets are available. For wireless operation, purchase wireless operator station and radio/antenna found in the RC Monitor Controls and Accessories section of the catalog.

All TFT RC monitors are capable of being controlled by multiplex CANbus system. Contact factory for details.

MONSOON® RC 1250

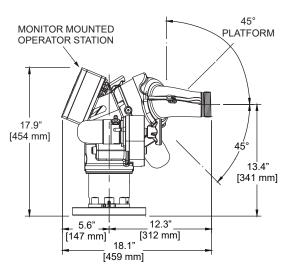

Remote Controlled High Clearance - 4750 I/min Designed for Platform Applications

The Monsoon RC for Platform installations is similar to the standard Monsoon RC. This model of Monsoon RC has the control box mounted at the top to give a reduced swing radius, thereby giving more clearance for Platform Installations. Knobs for manual override are provided on the horizontal rotation and elevation drive. Also comes with factory installed travel stops to limit the horizontal travel to 180° (90° either side of a center

position). The monitor can be controlled using the CANbus module for operation and for indication that the monitor is in the PARK position. A monitor mounted control panel allows vertical, horizontal nozzle pattern adjustments and programmable Park and Oscillate. For wireless operation, purchase wireless operator station and radio/antenna found in the RC Monitor Controls and Accessories section of the catalog.

All TFT RC monitors are capable of being controlled by multiplex CANbus system.

MONSOON® 2000

Manually Controlled Monitor - 7600 I/min

The Monsoon is a manually operated monitor designed for flows up to 7600 l/min. Maximum operating pressure is 14 bar. Unique patented segmented waterway has only 1 bar friction loss at 7600 l/min. Water makes very few turns as it travels through the monitor resulting in low friction loss and a far-reaching effective stream. Elevation range is 90° above horizontal to 45° below. Field changeable elevation travel stops at 45° above, 30° above, and 30° below horizontal. The manual model has continuous

135° either side of a center position. Available with various inlet flanges and threaded fittings. Inlet also made for direct connection to TFT's Valve Under Monitor series. Main waterway made from hardcoat anodized ANSI 356-T6 aluminum.

Silver powder coat finish inside and out is standard, except when "- Z" is added to the end of the model number. Models ending in "- Z" have American Red powder coat finish. Standard outlet is 90 mm NH male thread.

MONSOON® RC 2000

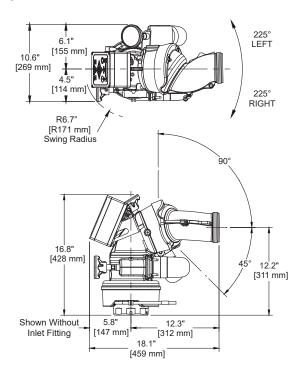

((

The Monsoon RC for pumper installations is an electric remote controlled monitor that has all the benefits of the Monsoon monitor with the addition of powered operation. Designed for 12 VDC or 24 VDC operation, selection is automatic. The Monsoon RC comes with a factory installed control panel mounted on the monitor for controlling horizontal rotation, elevation, nozzle pattern and programmable PARK and Oscillate. The motor control circuits are factory installed on the monitor and use position encoders and current limiting to protect the drive train at the ends of travel. Unit comes with 30 feet of ultra-flexing robotics cable already wired to the monitor so installation effort is minimized. Cable has only four conductors (two for power and two for communications), further easing the installation effort. Cable is enclosed in a unique wire guide that allows

450° of horizontal travel (225° either side of a center position), which is far more reliable than slip rings or coil cords. Knobs for manual override are provided on the horizontal rotation and elevation drive. TFT's Master ERP nozzles plugs into the factory installed nozzle power wire. Electric drives and control box are waterproof. Main waterway made from hardcoat anodized ANSI 356-T6 aluminum. Silver powder coat finish inside and out. Standard outlet is 90 mm NH rigid male thread. For wireless operation, purchase wireless operator station and radio/antenna found in the RC Monitor Controls and Accessories section of the catalog.

All TFT RC monitors are capable of being controlled by multiplex CANbus system.

CE

Remote Controlled High Clearance - 7600 I/min Designed For Ladder and Platform Applications

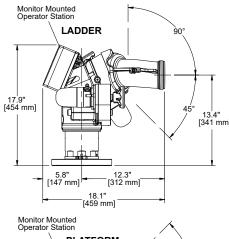

The Monsoon RC for Ladder or Platform installations is similar to the standard Monsoon RC. This model of Monsoon RC has the control box mounted at the top to give a reduced swing radius, thereby giving more clearance for Ladder Truck or Platform Installations. Knobs for manual override are provided on the horizontal rotation and elevation drive. Also comes with factory installed travel stops to limit the horizontal travel to 180° (90° either side of a center position). Some Ladder and Platform models include an electronics enclosure and 10' of cable to connect signals from the primary control station (such as the turntable toggle switches). These signals can either be hard wired or from a Canbus output module output. The Platform model's electronics enclosure contains an additional 10' cable to connect signals from a secondary control station (such as from basket toggle switches). The primary control signals will always override any signals from the secondary control or the monitor operator station. The electronics enclosure is factory configured to accept +12/24 VDC signals, but can be reconfigured in field to accept ground signals. This electronics enclosure also includes a relay to indicate when the monitor is in PARK position and has

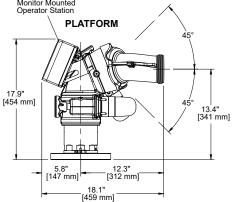

contacts that can be connected into the Canbus or multiplex system. A monitor mounted control panel allows vertical, horizontal nozzle pattern adjustments and programmable PARK and Oscillate.

Ladder/platform electronics enclosures includes inputs for DEPLOY monitor, INHIBIT monitor.

All Ladder & Platform version monitors include electronic "sit/stay" feature to keep powered monitor from rotating during travel.

Ladder version monitors (unless otherwise noted) include antiback drive gear box to keep unpowered monitor from rotating during road travel.

TSUNAMI™ RC

Remote Controlled Monitor - Up To 8,000 gpm (30,000 l/min)

The Tsunami RC is an electric remote controlled monitor capable of flowing 30,000 l/min. Waterway with turning vane has only 1 bar friction loss at 30,000 l/min. Elevation range is 90° above horizontal to 10° below. Field changeable elevation travel stops. Horizontal travel is 320° (160° either side of a center position). Field changeable horizontal travel stops. Designed for 12 VDC or 24 VDC operation, selection is automatic. The Tsunami monitor comes with a control panel on the monitor for horizontal rotation, elevation, nozzle pattern, programmable Park and Oscillate. The motor control circuits use position

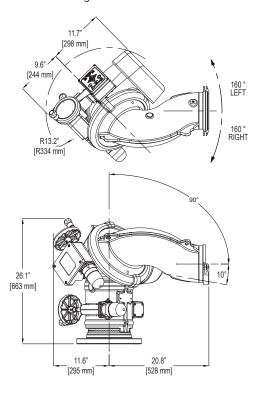

encoders and current limiting to protect the drive train at the ends of travel. Unit has waterproof factory installed plug on power wire for easy removal or reinstallation. Handwheel for manual override are provided on the horizontal rotation and elevation drive. Electric drives and control box are waterproof and have a IP66/IP67 rating. Main waterway made from hardcoat anodized aluminum. Silver powder coat finish inside and out. For wireless operation, purchase wireless operator station and radio/antenna found in the RC Monitor Controls and Accessories section of the catalog.

MODEL	DESCRIPTION	LENGTH	WEIGHT
YE-CAN2	Converts CANbus signals into serial communications for controlling a TFT RC monitor or valve	13.7 L x 4.2 W x 3.5 cm H	85 gr

These accessories and components are for use with EF1, Tornado RC, Hurricane RC, Typhoon RC, Monsoon RC and Tsunami RC and allow control of the monitors at remote locations. The Panel Mount, Tethered and Wireless Operator Stations have a waterproof membrane switch to control vertical, horizontal, and nozzle patterns, as well as the programmable PARK and Oscillate. Power, PARK and Oscillate indicator lights are standard. Two Auxiliary buttons to control lights, valves,

Extend-A-Guns and other equipment, are included and require the Remote Auxiliary Function Relay Interface Box or valve kit or Extend-A-Gun RC. All operator stations are equipped with "last button pressed" software so any button presses from the operator station will take over control from any other operator station. These operator stations can also be configured "master", by an internal DIP switch, as a "master" station so that commands from the operator station cannot be overridden.

PANEL MOUNT MONITOR OPERATOR STATION WITH DISPLAY

¥4E-RP-D

- YE-RF-RAD-9
- YE-RF-RAD-24
- When ordered at the same time as the RC monitor, radio and antenna will be installed by TFT assembly personnel

NOTE: This item is required when ordering RC monitor and wireless controller. One radio and antenna per monitor.

MULTIPLEX ADAPTER FOR RC MONITOR AND VUM

- YE-CAN2
- 3.0 oz (85 gr)
- 13.7 L x 4.2 W x 3.5 cm H
- YE-CAN2-NR (has cut resistor)
- Converts CANbus signals into serial communications for controlling a TFT RC monitor or valve
- Designed to work on a J1939 CANbus system and allows control of all TFT RC Monitors and RC Valve Under Monitor
- Easily connects in-line to monitor or valve cable

PANEL MOUNT RC EXTEND-A-GUN OPERATOR STATION

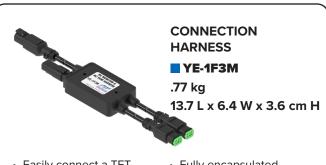

- XGA-RP
- 0.5 kg

13.30 cm x 9.5 cm

- Allows the RC Extend-A-Gun to be controlled from a remote location
- Designed to be flush mounted
- Includes 3.6 m pre-connected cable

NOTE: This operator station is required if the RC Extend-A-Gun is installed without a TFT RC Monitor. An included 1.8 m cable must be installed into the RC Extend-A-Gun interface box.

- Easily connect a TFT RC Monitor to a Valve Under Monitor (VUM) and other controller
- Simply plug into existing wiring harness plugs on TFT RC products
- Fully encapsulated to protect from the environment, with mounting holes
- Simply a wiring connection harness with 1 female with 0.3 m cable and 3 male connections, one with 1.8 m cable, one with 2.4 m cable

- 2.30 kg

25.40 H x 12.1 W x 12.1 cm L

- Allows any TFT RC electric monitor to be controlled using a joystick
- · Thumb switch controls nozzle pattern
- Trigger built into the joystick handle can be used to open and close TFT water valves
- A 3 m cable is supplied
- · Push buttons on top for PARK and OSCILLATE functions as well as monitor DEPLOY
- · Additional configurable button can be set up for RC Extend-A-Gun or LED light kit control

Y4-JS Cable has stripped wires

Y4E-JS-51 Cable has plug and includes bulkhead receptacle with stripped wires for connection to control system.

Y4E-JS-52 Cable has plug to connect to YE-VK valve interface box

NOTE: Consult Manual LIY-500 at tft.com/documents for instructions to enable proportional speed control.

JOYSTICK MONITOR OPERATOR STATION WITH GATEABLE **VALVE CONTROL AND BRACKET**

¥4E-JS-GT

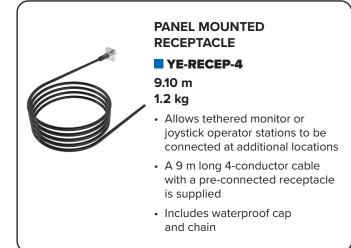

2.30 kg

25.40 H x 12.1 W x 12.1 cm L

- Allows any TFT RC electric monitor to be controlled using a joystick and includes a valve opening adjustment slider to control the valve position on TFT Gateable Valve Kits
- Thumb switch controls nozzle pattern
- Trigger built into the joystick handle can be used to operate TFT gateable valves
- Includes a 3 m cable
- Push buttons on top for PARK and OSCILLATE functions as well as monitor DEPLOY
- · Additional configurable button can be set up for RC Extend-A-Gun or LED light kit control

Y4E-JS-GT has cable and plug to connect to YE-VKG valve interface box.

NOTE: Consult Manual LIY-500 at tft.com/documents for instructions to enable proportional speed control.

MONITOR POSITION CE

¥4E-DISP

1.20 kg

10.8 L x 10.8 W x 3.3 cm H

- Shows the stream position of any TFT RC electric monitor
- Buttons for the PARK & Oscillate features and HIGH/ LOW speed selection
- A 3 m long 4-conductor cable for power and communication is supplied pre-connected

TOGGLE SWITCH MONITOR OPERATOR STATION

¥4E-TS

1.20 kg

12.4 L x 8.1 W x 5.6 cm H

- Allows any TFT RC electric monitor to be controlled using three toggle switches for left/right, up/down, and fog/stream
- Operator station can be surface mounted
- A 3 m long 4-conductor cable for power and communication is supplied pre-connected

REMOTE AUXILIARY CE

INTERFACE BOX

YE-REMAUX

1.20kg

12.4 L x 8.1 W x 5.6 cm H

- Allows user to utilize the AUX1 and AUX2 buttons located on the monitor operator station
- Two relays that can operate lights, interface to a valve controller or a valve directly
- Contact rating is 16 amps @ 30VDC for resistive loads and 8 amps @ 30VDC for inductive loads
- A 3 m long 4-conductor cable for power and communication is supplied pre-connected

VALVE POSITION DISPLAY

A-DISP

1.20 kg

10.8 L x 10.8 W x 3.3 cm H

- Five LEDs show the position of any TFT RC Ball Intake Valve or Valve Under Monitor
- · Buttons for valve open, stop, close

EXTEND-A-GUN™ VP

75 mm Pneumatic Telescoping Waterway with Valve

The latest addition to the TFT Extend-A-Gun series, the VP version offers a complete solution from TFT: monitor, nozzle, waterway, and valve! Deploy and stow operations are efficiently controlled by pneumatics and the inlet valve interlock system aids safe operations. Designed to flow up to 6000 L/min, choose from a variety of TFT monitors.

LOWERED POSITION TRUCK DECK

XGC38*-*

45.7 cm Extension (see chart) 24.5 kg

- Built-in safety with the interlock. It also includes a redundant manual override for deploy/stow operations for further security.
- In a single model number you can mount the gear box in one of four positions to ensure it fits your unique apparatus.
- Compatible with a variety of pumps, panels, and plumbing configurations so it's easy to install as well as service in the field.
- Installer supplied toggle switch controls on the panel keep the operator safely on the ground when deploying and stowing the monitor.

INLET	MODEL	EXTENSION	OUTLET
75 mm VICTAULIC	XGC38VL-XL	45.7 cm	CROSSFIRE Outlet (Monitor Top)
75 mm VICTAULIC	XGC38VL-PL	45.7 cm	75 mm NPT

* Fits inlet of Tornado RC, Hurricane RC, Typhoon RC or Monsoon RC monitors with 75 mm connection code-RLF.

75 mm BRACKET SET

For safe dependable service, the Extend-A-Gun MUST be securely mounted. To make the Extend-A-Gun as versatile as possible, three mounting bracket kits are offered. Each kit has a different upper bracket. The lower bracket is the same in all three.

EXTEND-A-GUN™ VP

75 mm Pneumatic Telescoping Waterway with Valve

Pneumatically Controlled

The deploy and stow positions are air operated and controlled by an up/down switch on the pump panel. Installers can utilize standard lines and fittings just like other pneumatic equipment on the apparatus.

Inlet Valve Interlock

The interlock prevents flowing while extending and retracting the VP. This prevents users from damaging the unit or becoming injured when deploying or stowing the system.

Valve Control Flexibility

The gear box can be oriented one of four ways to allow the crankshaft to face 3, 6, 9, or 12 o'clock. Position selection can easily be changed by removing four screws.

Multiple Inlet Plumbing Options

The TFT valve offers unrivaled plumbing flexibility. In a single SKU, OEM's can install plumbing connection to the bottom or side of unit. The valve also allows for flexibility in height. If the outlet port for monitor needs to be higher, simply use bottom inlet. If outlet port for monitor needs to be lower, a choice of two side port options are available.

INLET

CAPPED

Integrated Valve

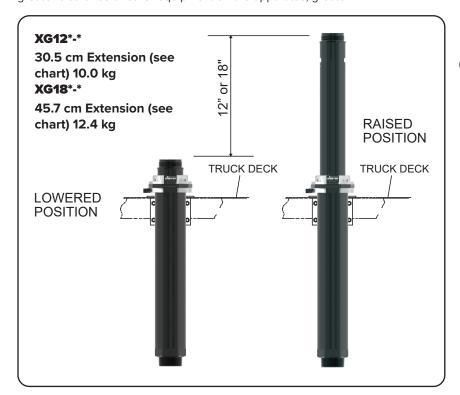

TFT has integrated a manually controlled valve that eliminates the need for a separate inline valve upstream from the Extend-A-Gun. The valve incorporates TFT's proven half ball design for longevity.

EXTEND-A-GUN™ MANUAL 75 mm Manual Telescoping Waterway

The Extend-A-Gun provides new capabilities for your deck mounted Master Stream device. For storage, it can be lowered to deck level (or even into a monitor well). On the fire ground, the monitor may be raised to its extended position (30.5 or 45.7 extra cm) by lifting the quick release and raising by hand until the non-rotating pipe locks into position. This gives greater clearance of other equipment on the apparatus, greater

freedom of movement and allows a more comfortable operating position. The Extend-A-Gun offers a full 75 mm waterway, hardcoat anodized finish, and built-in sensor for connection to "monitor raised" light or truck open compartment warning. Can be specified with new, or retrofitted to existing apparatus.

75 mm BRACKET SET

For safe dependable service, the Extend-A-Gun MUST be securely mounted. To make the Extend-A-Gun as versatile as possible, three mounting bracket kits are offered. Each kit has a different upper bracket. The lower bracket is the same in all three.

75 mm Remote Control Telescoping Waterway

The Extend-A-Gun RC3 lets you lower your deck mounted Master Stream device to deck level for storage (or even into a well). On the fire ground, the monitor can be automatically raised to its extended position (30.5 or 45.7 extra cm) with a simple push of a button. This gives greater clearance of other equipment on the apparatus, greater freedom of movement, and keeps firefighters off the top of the trucks, thus providing a safer operating position. The Extend-A-Gun RC3 offers a 75 mm waterway, and hardcoat anodized aluminum finish. Built-in sensor for connection to "monitor raised" light or truck open

compartment warning. Connecting RC Extend-A-Gun motor control box to RC monitor communication link (blue & white wires) allows RC Extend-A-Gun operation from any monitor operator station equipped with monitor up/down button or input. Can be specified with new or retrofitted to existing apparatus. NOTE: Extend-A-Gun RC is not compatible with other manufacturers' monitors. XGA-RP operator station (found in the RC Monitor and Controls Accessories section) is required if the RC Extend-A-Gun is to be installed with a TFT manual Monitor.

CE

- Allows the RC Extend-A-Gun to be
- controlled from a remote locationDesigned to be flush mounted
- Includes 3.6 m pre-connected cable

NOTE: This operator station is required if the RC Extend-A-Gun is installed with a TFT Manual Monitor. An included 1.8 m cable must be installed into the RC Extend-A-Gun interface box.

75 mm BRACKET SET

For safe dependable service, the Extend-A-Gun MUST be securely mounted. To make the Extend-A-Gun as versatile as possible, three mounting bracket kits are offered. Each kit has a different upper bracket. The lower bracket is the same in all three.

EXTEND-A-GUN™ RC4

100 mm Remote Control Telescoping Waterway

The Extend-A-Gun RC4 lets you lower your deck mounted Master Stream device to deck level for storage (or even into a well). On the fire ground, the monitor can be automatically raised to its extended position (30.5 or 45.7 extra cm) with a simple push of a button. This gives greater clearance of other equipment on the apparatus, greater freedom of movement, and keeps firefighters off the top of the trucks, thus providing a safer operating position. The Extend-A-Gun RC4 offers a 100 mm waterway, and hardcoat anodized aluminum finish. Built-in sensor for connection to "monitor raised" light or truck

compartment operator warning system. Connecting RC Extend-A-Gun motor control box to RC monitor communication link (blue & white wires) allows RC Extend-A-Gun operation from any monitor operator station equipped with monitor up/down button or input. Can be specified with new or retrofitted to existing apparatus. NOTE: Extend-A-Gun RC is not compatible with other manufacturers' monitors. XGA-RP operator station (see RC Monitor Controls and Accessories section of the catalog) is required if the RC Extend-A-Gun is to be installed with a TFT manual Monitor.

MASTER STREAM 1250 SERIES 1100-4500 I/min Large Body

The Master Stream 1250 has the ability to produce an excellent hard-hitting stream at any volume from 1100 - 4500 l/min. It is adjustable from a straight stream to a dense fog pattern. This nozzle features TFT's exclusive pressure adjustment knob. With a twist of the large knob on the front of the nozzle, operating pressure can be immediately adjusted to tactile detent settings between 4.8 and 8.3 bar. At pressures other than 7 bar,

maximum flow is determined by K-factor of 125. Applications include truck mounted deluge devices, aerials, fireboats, industrial applications, or where a flow of 1100 - 4500 l/min is necessary or desired. Suitable for use with foam and accepts the FJ-LX-M3 FOAMJET low expansion air aspirating attachment

This nozzle features TFT's exclusive pressure adjustment knob. With a twist of the large knob on the front of the nozzle, operating pressure can be immediately adjusted to settings between 4.8 and 8.3 bar. At pressures other than 7 bar, maximum flow is determined by K-factor of 150

MASTER STREAM 2000 SERIES 1100-7600 I/min

The Master Stream 2000 has the ability to produce an excellent hard-hitting stream at any volume from 1100 - 7600 l/min. It is adjustable from a straight stream to a dense fog pattern. The recently redesigned nozzles are substantially shorter and lighter than their predecessors. With a twist of the knob on the front of the nozzle, operating pressure can be immediately adjusted between 5.5 and 8.0 bar. At pressures other than 7 bar, maximum flow is determined by K-factor of 230. Applications include truck mounted deluge devices, aerials, fireboats, industrial applications, or where a flow of 1100 - 7600 l/min is necessary or desired.

INDUSTRIAL ZN FIXED NOZZLE

The TFT fixed gpm water nozzle is a simple and rugged industrial nozzle with superior stream quality and reach. This fixed gallonage fog nozzle rated at 7 bar is available with your choice of 950, 1300, 2000, 3000 l/min. Fog angle is user adjustable between 120° wide fog and straight stream. The nozzle's baffle can be removed with a wrench for flushing debris. The standard inlet is 65 mm NH or BSP female thread. The simple and basic design requires minimal maintenance. The ZN series has UV resistant rubber bumper and is hardcoat anodized aluminum.

 ϵ

Electrically operated pattern control for use on remote applications. The rugged, aluminum drive is totally enclosed and waterproof. The 12 to 24 volt drive unit draws 3 amps. There is a manual override if the electrical power fails. Water pattern adjusts from straight stream to a 120° wide fog. The nozzle can flush 9.5 mm debris without shutting down. Nozzle and actuator are hardcoat anodized aluminum for maximum resistance to corrosion and wear. Tip does not shut-off.

When ordering a nozzle for use on TFT RC monitors, order plug version (ERP). ERP versions are equipped with SMART STREAM technology. This technology utilizes a position encoder in the nozzle actuator to give the user greater control of the stream pattern, especially at FOG position. Nozzles equipped with a FLUSH

position are programmed to stop and pause at full FOG position when moving towards the FLUSH position, preventing excessive water flow. A second press of the button will cause the nozzle shaper to continue to move to flush position for removing debris from nozzle. Delivered with a waterproof plug connection for seamless integration with TFT's Tornado RC and EF1 RC monitors.

- For use on TFT Tornado RC and EF1 RC monitor
- Flush without shutting down
- Molded rubber fog teeth with full fill power fog
- Accepts both FJ-U lowexpansion and FJ-UMX FOAMJET multi-expansion foam attachments

FJ-LX-M	Master Stream 1000 Series	64.3 cm	2.9 kg

The TFT Master Stream 1250S series gives a clean, far-reaching straight stream. It is adjustable from straight stream to a dense fog pattern. Master Stream 1250S series nozzles are suitable for use with foam.

TFT's electric remote nozzles versions are equipped with SMART STREAM technology. This technology utilizes a position encoder in the nozzle actuator to give the user greater control of the stream pattern, especially around FOG position. Delivered with a waterproof plug connection for seamless integration with TFT's Hurricane RC, Flex RC, and Monsoon 1250 RC monitors.

- For use with TFT Hurricane RC, Flex RC and Monsoon 1250 RC monitors
- Continuously variable from straight stream to wide fog
- Molded rubber fog teeth with full fill power fog
- Accepts FJ-LX-M Low Expansion foam attachment

LOW EXPANSION FOAM ATTACHMENT FOAMJET™

Make your TFT nozzle a high performance foam nozzle with the FOAMJET air-aspirating attachment. Simple, rugged and dependable, the FOAMJET can be quickly attached to your TFT nozzle. The FOAMJET provides superior foam-making ability with most foam concentrates. When used with AFFF and Class A foams, the FOAMJET can develop expansion ratios of 6:1. This thick foam blanket has better extinguishing ability and is

longer lasting than foam from non-aspirated nozzles. The attachment can be easily removed in seconds for a water-only or non-aspirated stream. FOAMJET is used in straight stream position only.

Constructed of molded rubber, stainless steel, and lightweight nickle plated aluminum.

FOAMJET[™]**LX**

The FOAMJET-LX is a lightweight, low-expansion foam-making, air-aspirating attachment. Simple, rugged and dependable, the FOAMJET-LX can be quickly attached and provides superior foam-making ability with most foam concentrates. When used with AFFF and Class A Foams, the FOAMJET-LX can develop a thick foam blanket which has better extinguishing ability and

is longer lasting than foam from non-aspirating nozzles. The FOAMJET-LX can easily be removed in seconds for a wateronly or non-aspirated stream. It is constructed of durable UV stabilized polyethylene, stainless steel, and aluminum. FOAMJET-LX is used in straight stream position only.

MX FOAMJET™ and FOAMJET™LX FOR MASTER STREAM NOZZLES

The MX-FOAMJET & FOAMJET-LX for Master Stream Nozzles are lightweight, low & multi expansion foam-making, airaspirating attachments. Simple, rugged and dependable, the MX-FOAMJET & FOAMJET-LX can be quickly attached and provide superior foam-making ability with most foam concentrates. When used with AFFF and Class A Foams, the MX-FOAMJET & FOAMJET-LX can develop a thick low and

multi-expansion foam blanket which has better extinguishing ability and is longer lasting than foam from non-aspirating nozzles. The MX-FOAMJET & FOAMJET-LX can easily be removed in seconds for a water-only or non-aspirated stream. Rotating the MX-FOAMJET gives you the unique ability to vary the expansion ratio and stream reach of the finished foam. FOAMJET-LX is used in straight stream position only.

MULTI EXPANSION FOAM ATTACHMENT MX FOAMJET™

The MX-FOAMJET is a simple to attach, lightweight multiexpansion foam-making attachment for your Task Force Tips nozzle. The MX-FOAMJET has the unique ability to vary the expansion ratio and the stream reach of the finished foam. Foam expansion and reach can be controlled by varying the stream pattern of the nozzle. The ability to regulate the reach and expansion ratio is unique to the MX-FOAMJET. It can be easily removed in seconds for a water-only or non-aspirated stream.

FJ-MX-DQ, FJ-MX-F and FJ-MX-FQ constructed from durable UV stabilized polypropylene and hardcoat anodized aluminum.

PORTABLE MULTI-PURPOSE FOAM SYSTEM PRO/pak°

TFT's PRO/pak foam injection and application system is the ideal choice and works with most Class A and Class B foams.

Everything you need is contained in one package that attaches to the end of your 25 or 38 mm fire hose. The PRO/pak has a high impact 9.5 I foam reservoir with a built-in eductor that can be set to the ratio of foam or wetting agents being used. A large, easy-open fill port has an indicator to show the type of liquid in the tank. Flow is controlled by a twist grip valve that also functions as a carrying handle.

With three different quick connect nozzles included, the PRO/pak system is capable of producing low or medium expansion finished foam, while operating at low inlet pressures.

- Rapid Suppression Foam System That Is Rugged, Compact and Lightweight
- Works with most Class A and Class B Foam Concentrates

3-WAY VALVED MANIFOLD

TFT's 3-Way Valved Manifold is a rugged manifold with three 64 mm valved discharge ports, each with a full 64 mm waterway. Maximum operating pressure is 300 psi (20 bar). Valve seats are field replaceable. Quarter turn valve handles operate with low force to move even under pressure. Automatic valve lock keeps its position while flowing at partial openings. Folding handles

minimize storage space. Aluminum casting is hardcoat anodized and silver TFT Powder Coat finish inside and out for maximum corrosion protection. Optional adjustable pressure relief valve. Optional rugged 3/4" (19 mm) air bleed valve to quickly bleed air from the lines or to drain water from the valve housing.

5-WAY VALVED MANIFOLD

The 5-Way Manifold is a compact, portable, low friction-loss valve that can be used in many water distribution applications. The hydraulically actuated slide valve is combined with four of TFT's 65 mm slow close valves. Multiturn knob meets slow close requirements, prevents water hammer. Includes a visual valve position indicator and makes for the ultimate in versatility. All four 65 mm valves can be used with or without the LDH valve being open. Valve seats are field replaceable.

The automatic valve lock on the 65 mm valves maintain valve position while flowing at partial openings. Device includes carrying handle, a pressure gauge and pressure relief valve (PRV). A polymer bearing ring helps prevent galvanic corrosion on LDH couplings.

Storage bracket available.

BARREL STRAINER

JUMBO BARREL STRAINER - Heavy duty barrel strainer gives maximum flow capability. The impact resistant polymer won't dent when dropped and won't corrode even in contaminated water. The wavy straining pattern resists debris sucking flat

against the holes. 240 holes total 310 cm² of flow area. An oversize loop makes tying off the strainer easy. The coupling is made from hard anodized aluminum and rotates easily on a polymer bearing ring.

FLOATING LOW-LEVEL STRAINER WITH JET SIPHON

Flotation device allows TFT high volume low-level strainer to collect water from ponds, lakes, and rivers while minimizing intake of sediment. The strainer inlet, made of hard anodized and powder-coated aluminum, hangs 45.7 cm below water level to avoid sucking surface air and bottom debris. Capable of supporting up to 9 m of hose, the strainer extends well beyond safety ledges of residential ponds. The clog-resistant stainless steel filter has over twice as much flow area as a 150 mm hose. This keeps friction loss down to 0.03 bar at 5678 l/min and reduces the potential for air vortexes to form. Oversized sealed

ball pivot allows 45° range of hose angle without constricting the flow path. Jet Siphon substantially increases suction lift capability and is also useful for tank shuttle, pump priming and dewatering with no need for a trash pump. Jet Siphon has 38 mm female hose threaded coupling that pivots freely to avoid hose kinks. Rugged polyethylene float is yellow for high visibility and nests compactly over the strainer for minimal storage space. Float removal is not necessary for low level use, although a tethered latching hinge pin allows the float to be removed or installed instantly if desired.

FLOW & PRESSURE TESTING

Your safest and most effective fire attack comes from knowing how much you're flowing and at what pressure. TFT's SHO products give you accurate real time data instead of using formulas that only provide estimates. The digital flow meter and pressure gauge connect to any smart device via Bluetooth™ and provide all the information you need via free app. Set Pump Discharge Pressures (PDP) for your truck, determine nozzle reaction and hose friction loss, and more.

SHO-FLOW® APP

TFT's enhanced dual featured SHO-FLOW® app works either independently with established fire flow formulas, or in conjunction with TFT's SHO-FLOW Bluetooth® Flow meter, determining actual flow rates for fire hose lines and nozzles, in addition to calculating true Pump Discharge Pressures (PDP), Nozzle Reaction, Hose Friction, and allowing for real time NFPA flow testing.

When used in its stand alone water flow calculating mode, SHO-FLOW's app allows both Android or Apple users to calculate flow rate, nozzle reaction, hose friction loss, or to target fire flow rates by using the application's built-in time tested formulas.

The revolutionary app, designed to deliver information in either metric or USA units, allows custom naming of the team's SHO-FLOW meter device, as well as enabling an unlimited amount of

first responders to see real time flow rate, total water delivered, and device friction loss from up to a quarter mile away.

TFT's SHO-FLOW App is available in SEVEN languages: English, Spanish, German, Japanese, Chinese, French, and Portuguese.

The dynamic app also includes instant links to water flow education videos and recommendations for target fire flows when using water or foam.

The new and improved free application can be downloaded on Google Play or at the App Store. For those who wish additional information on how they can eliminate guessing and let you truly KNOW YOUR FLOW and elevate their operations to the highest level of performance on any fireground, please visit tft.com.

FREE APP DOWNLOAD SEARCH SHO-FLOW

The Know Your Flow Superior Combo SHO-FLOW Meter and SHO-FLOW App Superior When Combined, Exceptional On Their Own!

SHO-FLOW APP

 Alone it's a feature rich, full function flow calculator – the most comprehensive in the Fire Service

When integrated with TFT's SHO-FLOW Bluetooth Flow Meter.

- Basic formula calculations become pinpoint accurate information used to better train firefighters, standardize operational flows, and simplify incident reporting
- Accurately Create PDPs and SOPs Across All Flow Operations
- Real Time View of Flow Rates and Totals

SHO-FLOW FLOW METER

- Quickly and accurately determine the flow rate in a hose line, portable monitor, or deck gun
- No batteries or wires rugged, compact and affordable
- Available Flows:

 1.5" (38 mm) –
 25-125 gpm (100-500 l/min)
 and 50-300 gpm (200-1150 l/min)

 2.5" (65 mm) –
 100-500 gpm (400-2000 l/min)
 and 500-1250 gpm (2000-5000 l/min)

When integrated with TFT's SHO-FLOW App.

• Totalizes and displays accurate flow rates in Gpm, L/min, GPS, or LPS in real time

SHO-FLOW® 1 AND SHO-FLOW® 2 Bluetooth® Flow Meters

The SHO-FLOW BLUETOOTH is a water flow meter that is designed for installation in between any two lengths of hose. Any firefighting, training, or testing operation that utilizes hose lines or nozzles is an application for a SHO-FLOW BLUETOOTH flow meter. The SHO-FLOW BLUETOOTH has no wires to connect and no batteries are needed.

The SHO-FLOW BLUETOOTH App is available to download for free through Apple or Android app stores. The app displays the flow in user-specifiable units and includes calibration, totalizator and diagnostic tools.

EFF-NFNF300

- Built in stream straightener
- Will pass debris up to 25 mm in diameter
- Choose units you want displayed from your smart device; gpm, gps, l/min or l/sec

EFJ-BJBJ500 EFJ-NJNJ500 EFJ-NJNJ1250

- Built in stream straightener
- Will pass debris up to 43 mm in diameter
- Choose units you want displayed from your smart device; gpm, gps, l/min or l/sec

SHO-GAUGE™ Bluetooth® Pressure Gauges

Your ultimate pressure gauge. Read pressures on any smart device via Bluetooth using the SHO-GAUGE App, free from the App Store and the Google Play Store.

The compact, lightweight SHO-GAUGE units easily install on any 38 mm or 65 mm hose line, appliance or monitor. A stand alone SHO-GAUGE can be installed on most other devices like gated wyes and Pitot gauges for accurate pressure readings in PSI, KPa, and Bar

- Real time, accurate pressure readings up to 2000 KPa
- Choose PSI, KPa and Bar in the app
- · Protective cover ring
- · No wires needed
- App available on the Google and Apple App Stores

Power for the Bluetooth connection is supplied using a CR123A battery that is housed inside the sealed gauge cover.

The SHO-GAUGE App

You can download the SHO-GAUGE app on any smart device capable of downloading apps from the App Store or Google Play.

LINE PRESSURE GAUGES 1.5" and 2.5" (38 mm and 65 mm)

Featuring 0-200 psi (0-14 bar) for 2.5" (65 mm) and standpipe applications or 0-300 psi (0-21 bar) gauge designed for use on standpipes, truck outlets, on the ground, or where having a pressure reading is advantageous. System includes a protective ring and replaceable lens cover for the pressure gauge. Swivel inlet coupling and male outlet thread is standard.

The 1.5" (38 mm) and 2.5" (65 mm) in-line pressure gauges feature heavy-duty gauge protection and a replaceable lens.

- Large, easy-to-read, analog gauge displayed in both psi and bar.
- Lightweight and compact
- Reads pressure up to 300 PSI (20 bar)

What is the Health Continuum?

How do you approach conversations about health at your department?

Would a framework make them easier to address?

An Overview

As we joined your conversations about air and gross decontamination, we recognized a lack of a consistent framework for firefighter health discussions. There is plenty of talk about solutions, but no consistent way to organize your solutions to see if you are addressing all aspects of your life as a firefighter. We felt this was a disservice to the fire service and that reliable, consistent language was needed since these health considerations can have a significant impact on your quality of life.

To help you address and organize this information, we created the Health Continuum. This is a simple framework that can help you evaluate and discuss the health risks and concerns at your department.

The Structure

The Health Continuum is a single graphic that captures four points of exposure and potential health concern for firefighters. Informed by NFPA (National Fire Protection Association) standards, the graphic includes four broad categories meant to encompass the places a firefighter would experience a health risk on duty: station, apparatus, incident, team.

These four categories are further broken down into common considerations. These categories encompass almost any health risk you and your team would have.

The goal of the graphic is to provide a framework for you to evaluate and discuss any health-related concerns at your department. This makes it easier to address these concerns and build a comprehensive plan to minimize your health risk and exposure.

Why Should You Use the Health Continuum?

The Health Continuum is a great resource for helping you, your department, and others use the same language when discussing firefighter health concerns.

Using this as a framework, you can examine and address concerns holistically and see how they fit into the larger framework of overall health. You can view and think through multiple exposure points for firefighters and find the habits and solutions that will work for you.

Exposure protection can help you and your crew in the future. Minimizing your exposure at all four points allows you to take control of your health and safety today and in the future.

As a firefighter, you work an inherently dangerous job. The Health Continuum is a tool that can help you evaluate and consider the solutions you need.

Learn More at TFT.com

CREWPROTECTTM

CrewProtect is a unique, self-contained and comprehensive air decontamination system for enclosed apparatus cabs ambulance bodies, and personal vehicles that protects first responders and their passengers from particulate soot, and volatile organic compounds (VOCs).

CrewProtect can be easily installed into new or existing apparatus. Runs on standard 12VDC or 24VDC truck power.

The system draws less then 2.5A in with 12VDC or under 1A with 24VDC and includes mounting brackets.

Most importantly, CrewProtect is safe. Competitive products don't tackle all major threats and may have the unintended consequence of adding more harmful contaminants into the air.

patent pending

3 year manufacturing defect warranty.

Color Options

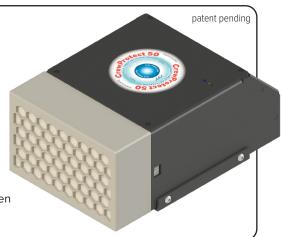

CrewProtect 100

• Decontaminates the air in the average cab or ambulance body every 3.5 minutes

- · Compact, Quiet, & Automatic
- Can be installed horizontally or vertically in any interior cab location or in the body of any ambulance.
- Connects directly to 12 volt or 24 volt systems
- · Automatically runs when the truck is operating.
- Operates at 100 CFM and only 60 decibels (below the NFPA maximum of 80 decibels)
- Fitted with Easy-to-Change, Long Life Cartridges
- Cartridge Life Indicator (Color LED Light, RFID Technology) visual alert when the cartridge needs to be replaced
- Cartridge is designed to completely neutralize harmful chemical contaminants, making it safe to simply discard in the normal trash
- Sturdy, powder coated metal for durability

CrewProtect 50

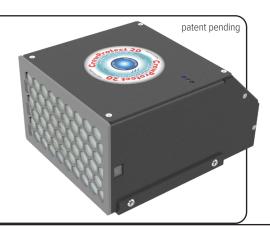

- The CrewProtect 50 is suitable for vehicles roughly the size of your average family SUV
- 12 VDC; Choice of Grey or White powder coated metal body for durability
- Effective in enclosed cabs up to $5.66\ \text{cubic}$ meters
- 50 CFM (1.41 CMM
- Easy-to-read LED lights indicate when the cartridge needs replaced
- Mitigates VOCs, particulates, mold, and smoke
- Suitable for tiller cabs, wildland vehicles, ambulances, SCBA/gear compartments, or tight city cabs. An easy-to-read LED light indicates when the cartridge needs to be replaced

CrewProtect 20

The CrewProtect 20 is suitable for vehicles roughly the size of your average family sedan.

- 24 VDC or 12 VDC; Choice of Grey or White powder coated metal body for durability
- Effective in enclosed cabs up to 1.42 cubic meters
- 20 CFM (.57 CMM)
- Easy-to-read LED lights indicate when the cartridge needs replaced
- Mitigates VOCs, particulates, mold, smoke, and aerosols carrying viruses and bacteria

Pinpoint Your Opportunities

Air Card

CREWPROTECT™ REPLACEMENT CARTRIDGES

REPLACEMENT CARTRIDGE / MEDIA US AND INTERNATIONAL	DESCRIPTION
CC-305	CrewProtect 100 replace media when Cartridge Life Indicator LED displays RED. Six Months or 1,800 Hours Active Usage
CC-059	CrewProtect 50 replace media when Cartridge Life Indicator LED displays RED. Six Months or 1,800 Hours Active Usage
CC-029	CrewProtect 20 replace media when Cartridge Life Indicator LED displays RED. Six Months or 1,800 Hours Active Usage

STATIONPROTECTTM

After returning from a fire, PPE and equipment can contain harmful particulates and continue to off-gas for extended periods.

StationProtect cleans the station air and protects crews from cancer causing soot, VOCs and also improves air quality by reducing mold. Useful in gear storage and cleaning areas, sleeping quarters and public spaces.

Key Features

- Cleans the air in gear rooms, sleeping quarters, and living spaces up to 731 $m^2\P$ with an airflow up to 655 cfm
- Quickly and effectively removes particulates, VOCs, molds, and smoke.

Cutting Edge Decontamination Technology

- No hassle decontamination modules containing 40 lbs (18 kg) of patented§ decontamination media (replaced annually)
- True HEPA filtration for harmful sub-micron particulate matter

Easy Operation, Install, and Use

- Portable on casters for placement anywhere in the facility
- Low maintenance, easy to use with a single knob, and works on standard electrical outlets
- · Durable brushed aluminum exterior
- 2 year manufacturing defect warranty

DECON/PAK[™]

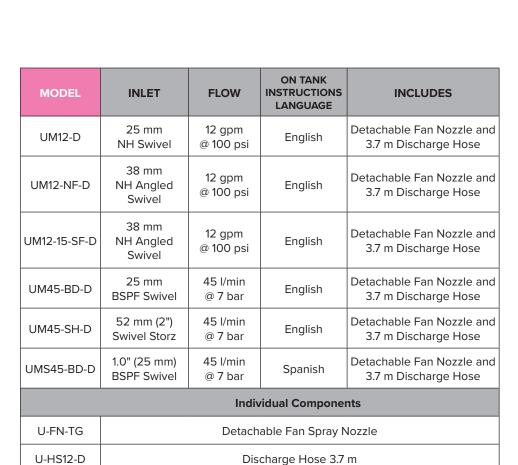

Portable Decontamination System

The DECON/pak Portable Decontamination System allows for simple and rapid gross decontamination of personnel and equipment at the fire scene or any location with a water source. The tank's capacity is 9.5L for the decontamination agent of choice. The pressure vacuum seal on the lid and inlet debris screen ensure that the approved agent chosen can be stored ready for immediate use and mixed with incoming water from a 25 or 38 mm hoseline.

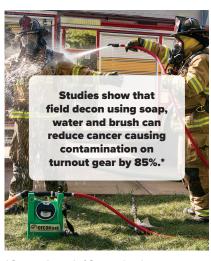

A wide variety of agents can be used and the proportioning system can be adjusted from 0.1 to 0.5% or easily overridden with a flow of just water for rinsing. The unit includes an integrated twist shut-off valve, selective injection metering knob, and is easily disassembled for cleaning. A detachable, hard hitting fan spray nozzle is attached to a 3.7 m discharge hose for ease of use during agent application or rinsing operations. The unit's flow rate is 45 l/min @ 7 bar.

UM12-D

- A lightweight, selfcontained portable system for rapid gross decon
- Can be used for personnel, PPE and equipment**
- Operational Instructions molded into the side
- Up to 9.5L of agent can be stored in the tank
- Compatible with a wide variety of detergents, and disinfectants
- Single 0.1 to 0.5% proportioning selection and rinse option
- Includes fan shaped nozzle attached to a 3.7 M hose
- Available in a variety of inlet sizes and coupling styles

Storage Bracket
